

CONTENTS

VOLUME 17, Nos 1-15

Issue No. 1, January 1994

Beyond Quenching for Singular Reaction-Diffusion Problems: C. Y. Chan and Lan Ke	1
Stabilization Estimates for Penetrative Motions in Porous Media: F. Franchi	11
Polygonal Interface Problems for the Biharmonic Operator: S. Nicaise	21
Numerical Analysis of Semi-linear Parabolic Systems in Diffusion-Reaction Problems: D. Fayyad and N. Nassif	41
Approximating Sequences for Heteroclinic Orbits: B. Kazmierczak	71

Issue No. 2, February 1994

On Boundary Controllability of One-dimensional Vibrating Systems by $W_0^{1,p}$ -controls for $P \in [2, \infty]$: W. Krabs and G. Leugering	77
The Existence of Solutions of a General Boundary Value Problem for the Divergence: G. Schwarz	95
Local Compactness for Linear Elasticity in Irregular Domains: N. Weck ..	107
Resonance Phenomena in Infinite Strings with Periodic Ends: P. Werner. . .	115

Issue No. 3, March 1994

Stability and Asymptotic Behavior in a Reaction-diffusion System: W. Feng.	155
Mathematical Problems of Liquid Crystal Flows: M. Carme Calderer	171
Bifurcations of Strongly Non-linear Self-excited Oscillations: A. Doelman and F. Verhulst	189
On the Averaging Method for Rod Equations with Quadratic Non-linearity: R. P. Buitelaar	209

<p>Indexed or abstracted by Applied Mechanics Reviews, Boundary Elements Abstracts, Cambridge Scientific Abstracts, Compumath Citation Index, CC/Phys. Chem & Earth Sciences, Engineering Index, Engineering Societies Library, INSPEC, Mathematical Reviews, Research Alert, SCISEARCH database, VINITI-USSR Academy of Science and Zentralblatt für Mathematik.</p>

Issue No. 4, April 1994

Landesman-Lazer Resonance Problems and Saddle Point Methods: M. Schechter.....	229
An Elementary Proof of the Exponential Blow-up for Semi-linear Wave Equations: H. Takamura	239
A Principle of Linearization and the Uniform Asymptotic Stability of Solutions of the Navier-Stokes Equations for Compressible Isothermic Fluids: J. Neustupa	251
The Stationary and Non-stationary Stokes System in Exterior Domains with Non-zero Divergence and Non-zero Boundary Values: R. Farwig and H. Sohr	269
An Approximation Theorem in Inverse Electromagnetic Scattering: P. Hähner	293

Issue No. 5, 25 April 1994

Guided Waves by Electromagnetic Gratings and Non-uniqueness Examples for the Diffraction Problem: A.-S. Bonnet-Bendhia and F. Starling	305
Solitary Wave Solutions and Cnoidal Wave Solutions to the Combined KdV and mKdV Equation: S. Y. Lou and L.-L. Chen	339
Global Existence, Uniqueness and Asymptotic Behaviour of Solutions of the Wigner-Poisson and Schrödinger-Poisson Systems: R. Illner, P. F. Zweifel and H. Lange	349
Finite Element Approximation of a Microstructure Evolution: T. Roubíček.....	377

Issue No. 6, May 1994

General Interface Problems—I: S. Nicaise and A.-M. Sändig.....	395
General Interface Problems—II: S. Nicaise and A.-M. Sändig.....	431
Weak Solutions of the Initial-boundary Value Problem for the Vlasov-Poisson System: N. B. Abdallah	451
On Global Solvability of Non-linear Viscoelastic Equations in the Analytic Category: P. D'Ancona and Y. Shibata	477

Issue No. 7, 10 June 1994

<i>A Posteriori</i> Error Analysis for Linearization of Non-linear Elliptic Problems and their Discretizations: W. Han	487
Optimal Control for Parabolic Systems with Competitive Interactions: S. Lenhart and V. Protopopescu	509

Best Constants in Korn–Poincaré's Inequalities on a Slab: H. Ito	525
Stability Analysis of the Phytoplankton Vertical Steady States in a Laboratory Test Tube: E. Beretta, A. Fasano, Y. Hosono and V. B. Kolmanovskii	551

Issue No. 8, 25 June 1994

Properties of Simple Model Problems for Reacting Gas Flows: J. K. Tegnér.	577
A Tracking Method for Gas Flow into Vacuum Based on the Vacuum Riemann Problem: C.-D. Munz	597
Local Existence of Solutions to the Landau–Maxwell System: M. Zhan. ...	613
Limiting Behaviour of Invariant Manifolds for a System of Singularly Perturbed Evolution Equations: D. Ševčovič.	643

Issue No. 9, July 1994

Regularity of Solutions and Approximate Inertial Manifolds for von Karman Evolution Equations: I. D. Chueshov	667
A Finite Element Method and Stabilization Method for a Non-linear Tricomi Problem: N. A. Lar'kin and M. Schneider	681
Spectral Theory and L^∞ -time Decay Estimates for Klein–Gordon Equations on Two Half Axes with Transmission: the Tunnel Effect: F. Ali Mehmeti.	697

Issue No. 10, August 1994

Approximation of Solutions to Evolution Equations: P. D. Miletta	753
On a Semi-coercive Problem in a Porous Journal Bearing with Cavitation Problem as Boundary Condition and Subject to an Integral Condition: M. Boukrouche	765
Unique Solvability of the Periodic Cauchy Problem for Wave-hierarchy Problems with Dissipation: M. F. Göz.	787
A Fujita Type Global Existence–Global Non-existence Theorem for a Sys- tem of Reaction Diffusion Equations with Differing Diffusivities: M. Fila, H. A. Levine and Y. Uda.	807

Issue No. 11, 10 September 1994

On Stationary Flow of Asymmetric Fluids with Diffusion: P. Krzyżanowski.	837
Dynamical Stability of an Elastic Column and the Phenomenon of Bifur- cation: S. D. Furta	855

vi Volume Contents

Two Canonical Wedge Problems for the Helmholtz Equation: E. Meister, F. Penzel, F.-O. Speck and F. S. Teixeira	877
A Hyperbolic-Parabolic System Modelling the Thermoelastic Impact of Two Rods: K. T. Andrews, M. Shillor and S. Wright	901

Issue No. 12, 25 September 1994

On Identification of Memory Kernels in Linear Theory of Heat Conduction: L. von Wolfersdorf	919
Stability and Instability in Adiabatic Shearing Motions of Incompressible Fluids: S. Jiang	933
Control Problems with State Constraints for Shape Memory Alloys: J. Sokołowski and J. Sprekels	943
Asymptotic Behaviour of Solutions to Semilinear Wave Equations with Initial Data of Slow Decay: H. Kubo	953
Quantitative Error Estimates for Coefficient Idealization in Linear Elliptic Problems: W. Han	971
Full Low-frequency Asymptotic Expansion for Second-order Elliptic Equations in Two Dimensions: R. Kleinman and B. Vainberg	989

Issue No. 13, October 1994

Subsolutions and Supersolutions to Systems of Parabolic Equations with Applications to Generalized Fujita-Type Systems: G. Lu and B. D. Sleeman	1005
Generalized Spherical Harmonics and Exterior Differentiation in Weighted Sobolev Spaces: N. Weck and K. J. Witsch	1017
An Approximate Gidas-Ni-Nirenberg Theorem: E. Rosset	1045
The Existence of Global in Space Variables Solution for Non-linear Subelliptic Equation of Floating Water: L. Sidz	1053
Diffusion Limit for the Linear Boltzmann Equation of the Neutron Transport Theory: J. Banasiak and J. Mika	1071

Issue No. 14, November 1994

On the Boundary Transmission Problem of Thermoelastostatics in a Plane Domain with Interface Corners: L. Jentsch	1089
Stokes Flow of a Micropolar Fluid Exterior to Several Non-intersecting Closed Surfaces, but Contained by an Exterior Contour: H. Power and H. Ramkissoon	1115

Non-linear Stability for the Vlasov-Poisson System—the Energy-Casimir Method: G. Rein	1129
Completeness of the Wave Operators in Scattering of Classical Waves by Local Perturbations of a Cone Shaped Domain: F. Jochmann	1141

Issue No. 15, December 1994

The Oxidation Process of Silicon: Modelling and Mathematical Treatment: W. Merz and N. Strecker	1165
On a Mathematical Model for Hot Carrier Injection in Semiconductors: N. Ben Abdallah, P. Degond and C. Schmeiser	1193
Scattering Results for Measure Potentials with Unbounded Support: R. Ford	1213
